SAFETY COVERED FROM A-Z

INX InControl doesn't just manage incidents or risks like other systems. You'll have the spectrum of safety covered with the ability to create your own event types or manage the standard events such as incidents, injuries, audits, inspections, risks, hazards and more.

SEE WHAT IS HAPPENING FOR YOURSELF

With all WHS incidents, injuries, audits, meetings, inspections and events captured in the one place, granted users can see what is happening right away. Set indicators, targets and track actuals to ensure your safety management is on track.

INX Software is a globally trusted leader of fully-integrated environment, health and safety solutions driving the creation of safer, smarter and sustainable workplaces. Our cloud-based software and mobile-capable solutions are standard across high-risk and complex operations including mining, utilities, oil & gas and government sectors, with over 180 enterprise clients and 700,000 users to date. With a global team of industry experts, we enable health, safety and environmental professionals to manage risk, achieve compliance and enhance operational efficiencies across workforce mobilisation and travel logistics, workplace health and safety, environmental and statutory compliance, training and competency management. © 2020

INCREASE COMPLIANCE

INX Software is an integrated solution that provides the tools to support attainment and certification for ISO 45001, ISO 9001, ISO 14001, ISO 45001 as well as adoption of other system frameworks such as ISO 31000 and ISO 19600.

SAFETY ON THE GO

WHS extends beyond safety managers, safety officers, managers and superintendents. INX InControl Mobile ensures all employees and contractors can contribute by capturing events such as incidents, injuries, audits or inspections, completing checklists and actions anywhere on or offline directly from their phone or tablet device.

ENSURE ACCURACY OF INFORMATION

Get rid of excel spreadsheets. Managing risk at a corporate, enterprise or operational level has never been easier thanks to INX InControl. Risks are stored in a central register with the ability to create review events and link incidents to relevant risks.

ENCOURAGE SAFETY AT ALL LEVELS

INX InControl encourages user participation through ease of use and access. With more information being captured, managers and executives have greater insight into safety culture through the reporting, graphing and analytical tools or more visually through INX +BI dashboards.

SIMPLIFIED INSURANCE

Reduce your policy premiums by providing transparency and control over insurance costs by being able to manage claims through INX InControl which are linked to incidents, injuries and other relevant events.

REAL-TIME SAFETY MANAGEMENT

Having piles of papers or emails built up with reported incidents, audits, injuries and more adds time to your day and puts you behind. As a web based solution, you can access the information you want when you want so action can be taken when it matters most.

PROACTIVE, NOT JUST REACTIVE

Safety systems should do more than just capture incidents and injuries. With INX InControl you can schedule events such as audits, inspections, task observations and safety meetings so you can stay ahead. The scheduled reports functionality also means you can keep those who need to know in the loop whether you're in the office or not.

ZERO-HARM CULTURE

With INX InControl you can build your culture around a sustainable work environment that supports the health and safety of those in the organisation while minimising your environmental impact. With an effective safety system in place through INX InControl, you can now focus on new policies and processes to prevent incidents.
