

INX InViron Mobile

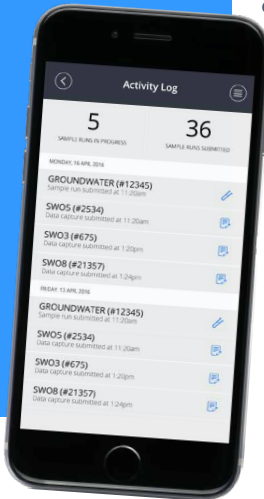

Capture and manage environmental field

Allowing users to capture and manage environmental field data remotely from their device.

INX INVIRON FEATURES

- Field log sheets
- Sample runs
- View assigned items
- Activity summary
- Track statuses
- Audit trail
- Time/date stamp records
- Accessible offline
- Due dates
- Connected to your person profile
- Works directly with INX InViron
- Native apps for iOS, Android and Windows

STREAMLINED DATA

Users can configure a variety of different field log sheet designs across the different monitoring programs in the INX InViron database. This design and functionality is copied through to INX InViron Mobile to ensure the business rules are applied at every point of data capture.

SIMPLIFY ENVIRONMENTAL DATA CAPTURE

INX InViron Mobile is designed to help users simplify the environmental data management process by providing a convenient, easy to use platform to capture data that mirrors the INX InViron configuration.

COMPLIANCE THROUGH SCHEDULING

A schedule of samples capturing sample runs, field log sheet design (including points and fields) can be built within INX InViron and assigned to individuals so that when logging in to their device they can see which samples must be completed and when.

ANYWHERE, ANYTIME

INX InViron Mobile enables users to capture data even when offline. Once a connection is re-established, the data stored on the device will be automatically uploaded to the INX InViron database.

SWITCH BETWEEN ACCOUNTS

If sharing a device, multiple individual profiles can be set up so users can switch between accounts to access information relevant to them.

REAL TIME DATA ACCESS

As soon as sample records are submitted from the mobile device, it is accessible from the INX InViron database and available for reporting, providing users with a central, single source of truth for all environmental data no matter how or where it is captured.

FIELD LOG SHEETS AND SAMPLES ON THE GO

Complete field log sheets and save samples to your device as you go. Once all samples have been completed, simply reopen your saved work and submit to the INX InViron database.

PERSONALISED FOR EASE OF USE

Upon login, INX InViron Mobile will refine the list of samples in the database to the ones relating to the user. Samples are ordered by their respective due dates so users will know what they need to do and when.

IMPROVE VISIBILITY

Track the status of your sample runs with clear markers to identify which ones are due, in progress, submitted or overdue.

VIEW YOUR ACTIVITY

View a summary of your activity by the number of sample runs in progress, sample runs submitted and daily activity breakdown.

INX Software is a globally trusted leader of fully-integrated environment, health and safety solutions driving the creation of safer, smarter and sustainable workplaces. Our cloud-based software and mobile-capable solutions are standard across high-risk and complex operations including mining, utilities, oil & gas and government sectors, with over 180 enterprise clients and 700,000 users to date. With a global team of industry experts, we enable health, safety and environmental professionals to manage risk, achieve compliance and enhance operational efficiencies across workforce mobilisation and travel logistics, workplace health and safety, environmental and statutory compliance, training and competency management. © 2020
