Highlights of this release

- 1 New SMS Report to send SMS's to a group of selected profiles**
A new Workforce Report **SMS104 Profile SMS** is now available. The report enables a user to create and send SMS's to a group of selected profiles using Report Criteria /rids and which can also be used for scheduling messages.
- 2 SAM People Profile Fields - Add Icons to Resource Summary**
SAM | People | Profile Fields, clients now have the feature of selecting specific Icons for existing and new profile fields within SamResourceSummary & WorkflowResourceSummary.
- 3 Multisector Edit In-Line**
SAM | Transport Type Active | Multi Sector | edit functionality has been included so that a user can update multiple Depart/Arrival times for scheduled transports which are included in Multi Sectors.

New Features, Improvements and Fixes

Improvements

1. An update to Workflow has been made to include a parameter **DisplayName** which makes the requestors' middle name visible on the task panel. [\[#26483\]](#)
2. Improved the Room Search page within **SAM | Bookings | Multiple Bookings** to include the rooms clean status, where Advanced Cleaning is in use. [\[#26649\]](#)
3. Workforce Report **SRF210 Room Lock** has been updated to allow dates to be filtered using the Year / Month / Date format within excel. [\[#26319\]](#)
4. The Workflow Menu has been updated to enable users within the parameter **ConfigEditLimit** to access and edit the **Workflow | Configuration | Unmatched Names** page. [\[#25830\]](#)
5. **SAM | People | Change | Shift Bulk** has been updated to enable updates to shift statuses for clients with multiple shift statuses, between a given date range and where no current shift status exists. [\[#26419\]](#)
6. Workforce Report **SRF149 Camp Arrival Departure Date Range** has been updated to include a selection of additional fields. [\[#26282\]](#)
7. SAM Parameter **AutomaticallyPickRoom** has been updated to apply at the Room Type level instead of the Camp level.

Fixes

1. Fixed an issue where an error message would occur when creating a roster booking under a room that is locked on the roster date. [[#26624](#)]
2. Fixed an issue in SAM where adding a new room type as non default would result in the default room type check box remaining ticked. [[#26523](#)]
3. Fixed an issue in SAM where creating a new roster pattern with more than one swing would result as 'Invalid'. [[#26525](#)]
4. Fixed an issue where generating the report with same criteria multiple times resulted in conflicting data.
5. Fixed an issue where results in Workforce Report **SRF176 Room Occupancy** included multi records for the same profile booking. [[#26403](#)]
6. Fixed an issue where SAM users updating a 'Room Type' could select types of rooms from camps at different locations. [[#24840](#)]
