

INX +Advanced Forecasting

Forecast future events to track supply and demand of site capacity and needs

INX +Advanced Forecasting provides visibility into the future needs of your site, today! The +Advanced Forecasting tool provides a timeline view for planning projects in the future based on site specific data trends.

INX +Advanced Forecasting enables Project Managers, Managers and Site Accommodation and Travel Administrators, to forecast future accommodation, catering and transport requirements for a site, against existing commitments and comprehensive historic data stored within the INX SAM Suite.

When coupled with INX SAM Suite, +Advanced Forecasting enables companies to evaluate site capacity and accommodation loads, and provide detailed forecasts that are updated based on current bookings. These forecasts can extend into 1 year, 5 year and even 10 year plans.

INX +ADVANCED FORECASTING FEATURES:

- Overcome administrative challenges or organizing large scale operations with priorities based on data inherited from SAM

- Manage and automate future booking constraints with ease, running forecasting reports at any time
- Real-time monitoring of bookings and visibility of changes
- Real-time updates of forecasts based on current booking changes
- Accurate reporting and monitoring of forecasting efficiency
- Easy to use timeline using a click and drag functionality
- User management systems in place to allocate levels of access, security, and ability to maintain process consistency and compliance
- Auto-synchronisation of all updates from the app upon changes to site data

MAIN ADVANTAGES:

- Create a forecast for your specific site
- Import and sync Department, Employer, Project and Camp details
- Seamless integration between the INX SAM Suite and INX +Advanced Forecasting
- Workforce Reports for indication of where actuals are variant from Forecasts to assist in future planning
- Inform and improve operational decision making
- Prediction of future constraints periods
- Assist with the prioritisation of works

INX Software is a globally trusted leader of fully integrated environment, health and safety solutions driving the creation of safer, smarter and sustainable workplaces. Our cloud-based software and mobile-capable solutions are standard across high-risk and complex operations including mining, utilities, oil & gas and government sectors, with over 200 enterprise clients and 700,000 users to date. With a global team of industry experts, we enable health, safety and environmental professionals to manage risk, achieve compliance and enhance operational efficiencies across workforce mobilisation and travel logistics, workplace health and safety, environmental and statutory compliance, training and competency management. © 2021
