- Manage competencies by role
- 3rd party system integration
- Cloud or hosted
- Integrated with Moodle

ENSURE A SAFE AND COMPLIANT WORKFORCE

Knowing your employees and contractors are equipped and qualified to do their job ensures you both remain compliant and can provide a safer working environment.

COVER YOUR ORGANISATION LEGALLY

Having people work in jobs they are not qualified for opens your company up to huge fines and risks. INX InTuition ensures you can easily track and identify gaps in individual competencies, compliances and procedures so you can address them immediately.

KEEP YOUR TEAM INFORMED

People can stay informed of training nominations and courses through INX InTuition's personalised in tray and email notifications.

SIMPLE COURSE MANAGEMENT

Create training courses and associate what competencies, compliances and procedures will be covered. Upon completion, the individuals' skill sets will be automatically updated in their profiles. CCP's are managed by INX InTuition with the INX Moodle Integration as the source of truth for courses.

IMMEDIATE VISIBILITY OVER TRAINING

Use the skills, capability and needs matrices to assess the current status of your workforce on one screen or see what training is required and schedule in another.

MINIMISING ADMINISTRATIVE OVERHEAD AND COSTS

Managing training for large groups of people is complex, especially when done through spreadsheets and disparate systems. INX InTuition ensures all your training can be managed in the one place where updates only need to be made once.

STREAMLINE AND CENTRALISE TRAINING MANAGEMENT

INX InTuition allows for the management of training from identifying individual

requirements and gaps to creating, scheduling and completing online and offline courses with the INX Moodle Integration.

INDIVIDUAL AND COMPANY LEVEL TRACKING

Track the level of compliance and competency at both an individual level through the person profiles or at a company level through the matrices and reporting tools.

ASSESS ROLE SUITABILITY

Use the role status tool to assess the suitability of an employee for their current role or for a new one based on the skills they possess against those required for the job.

ENSURE COMPLIANCE WITH STANDARDS

INX InTuition provides the tools so you can achieve compliance across ISO 45001, ISO 9001, ISO 14001, ISO 19011 and OHSAS 18001.

SIMPLE TRAINING REPORTS

Use the range of pre-built reports and graphs or create your own with the ad hoc reporting and graphing tools to address your reporting requirements.

MOODLE INTEGRATION

The integration between INX InTuition and Moodle® enables users to update their INX CCPs for their workforce's role requirements, based on course activity within Moodle®.

INX Software is a globally trusted leader of fully-integrated environment, health and safety solutions driving the creation of safer, smarter and sustainable workplaces. Our cloud-based software and mobile-capable solutions are standard across high-risk and complex operations including mining, utilities, oil & gas and government sectors, with over 180 enterprise clients and 700,000 users to date. With a global team of industry experts, we enable health, safety and environmental professionals to manage risk, achieve compliance and enhance operational efficiencies across workforce mobilisation and travel logistics, workplace health and safety, environmental and statutory compliance, training and competency management. © 2020
