and sustainable workplaces

INX Version 5.14 Release Highlights

Date: 9 November 21

1 Training

1.1 INX InTuition Moodle Integration

1.1.1 Moodle Integration INX 5.14

The InTuition Moodle Integration provides synchronisation of users, procedures, courses and course completions between InTuition and Moodle.

The integration is designed to eliminate as much admin overhead as possible. Moodle handles real-time online course & procedure delivery feeding back to InTuition - the source of truth.

For the workforce:

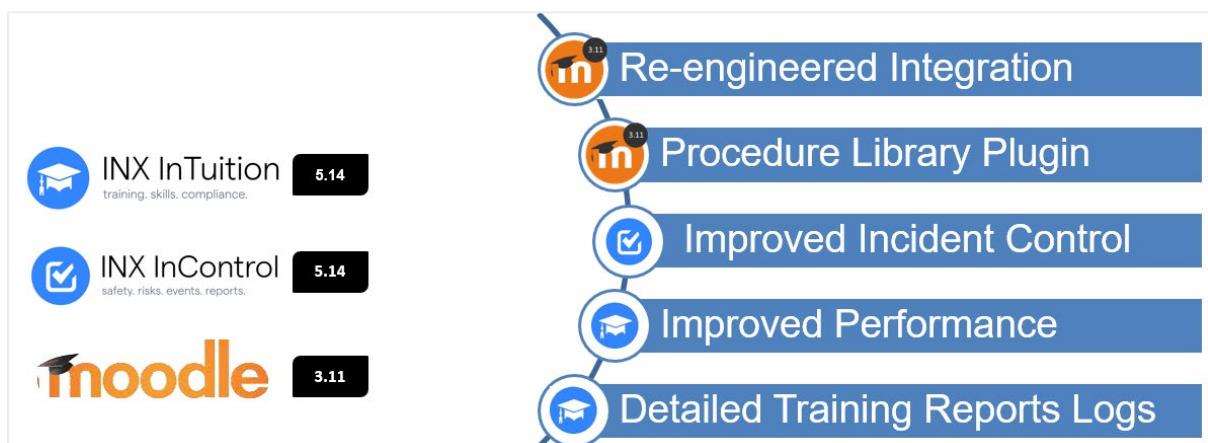

- Improved online training experience using the latest 2021 version of Moodle (Moodle 3.11)
- Improved performance when viewing Person Profile Role Status and CCPs
- Improved notifications from raised incident events in InControl

For Training Administrators:

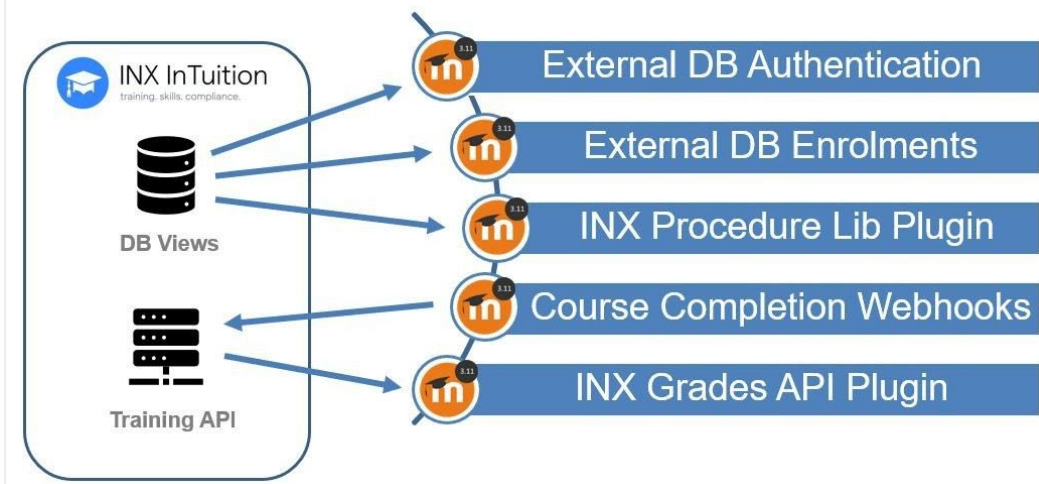

- Improved InTuition integration with the latest Moodle 2021 version of Moodle (Moodle 3.11)
- Easier Management of Users, Courses & Procedures in Moodle
- Improved Online Training Reports
- Improved Training Room capacity management
- Improved performance when viewing Person Profile Role Status and CCPs
- Improved handling when event types change in InControl

For System Administrators:

- The latest security improvements from version 3.11 of Moodle released in 2021
- A more de-coupled approach allowing easier upgrades of INX and Moodle
- Reduction in moving integration parts between INX and Moodle
- New Moodle Integration has its own DB schema outside of the INX DB

New InTuition - Moodle Integration

1.2 INX InTuition Improvements

1.2.1 InTuition INX 5.14

- Improved InTuition integration with the latest Moodle 2021 version of Moodle (Moodle 3.11)
