and sustainable workplaces

Release Notes

Update V6.3.17

08 December 2021

1 Highlights and New Features

Summary

We are pleased to confirm there is an upgrade to the INX SAM Suite V 6.3.17. Within this version the following features and fixes have been applied

Highlights

Add a Paperclip Icon to the Workflow Task Panel when attachments are added to a document

Workflow now has the ability to add a paper clip icon on the task panel to indicate if the request has attachments.

New Features

A new SAM user permission has been added that allows the user to update the booking status on the Carrier Booking page.

2 Improvements

When cloning workflow documents there is now the option to allow the requestor to edit the cloned documents before submitting for approval.

Improvements to the Multi Camp Roster functionality, to show different colours for different camps when previewing the roster.

Workflow user search has been updated to allow searching using the login name.

SAM now has the ability to create new lockers in bulk. Locker| Admin | Locker allows you to download a template to add all new lockers to SAM.

Improvements made to **SRF163 Arrivals Departures Report 2**, to add the departure time to the report. Report also updated to include Middle name when required. [#18536]

When assigning a room you are able to check room occupancy and remove future booking regardless of if the person is set to hotel.

A new SAM parameter HotelFlag has been added, when creating a new profile the Hotel checkbox will be selected based on this parameter value.

Improvements have been made to **SRF295 Vacant Rooms Report** to include a pivot table summarizing the data. [#26520]

Advanced Cleaning has been improved to display the room type and ownership status. [#26785, 25738]

Report **SRF258: Room Cleaning Daily Check** now includes the arrival date into the room for the person.

Report SRF163, arrivals and departures now includes the person's middle name.

Improved the way SAM manages Transport Moves with Multisector transports.

Report **SRF149 Camp Arrivals and Departures** has been updated to include the camp in the results and allow selection of multiple camps.

Workforce Reporting has the ability to upload SAM profiles from an Excel document which can be used to select profiles for reports such as **SMS104** "Send SMS messages to a group of selected profiles"

The SAM parameters for the default drive times is now configurable using a drive selection dropdown.

3 Fixes

Fixed an issue with Workflow when creating documents to be cloned.

Fixed an issue where booking pop up was displaying an error and preventing the document from processing. [#19822]

Fixed an issue where cleans were not reallocating. [#19748]

Fixed an issue with **SRF236 Bulk Flight Booking Input File** where columns were being removed when adding additional fields to the report. [#19729]

Fixed an issue in Carrier Bookings where passenger bookings were duplicating.

Fixed an issue in Workforce Reporting where users could not see their saved reports. [#19571]

Fixed an issue where the dates were inverting when splitting a booking. [#19461]

Fixed an issue with **SRF163 Arrivals and Departures 2 Report**, where data was not being returned when ADR was selected. [#19440]

Fixed an issue in the workflow task panel search where a single document type was not retaining the previous document selection in the dropdown. [#19386]

Fixed an issue with Advanced Forecasting Tool, where the Project membership was not updating.

Fixed an issue with Advanced Forecasting where Folio was not sending the Project ID to AFT.

Fixed an issue with **SRF187 Backcharge Report** where the Number of Charter Seats and Number of RPT Seats are incorrect [#18622]

Fixed an issue with **SRF210 Room Lock Report** to include the full name for group bookings. [#18241]
