INX+ADVANCED CLEANING

Enhance your cleaning capabilities

Provide your cleaning workforce with real-time support in-field and have complete visibility over your cleaning management processes.

INX +Advanced Cleaning is a comprehensive cleaning services management system that manages all things cleaning and maintenance within your site.

As an extension of the INX SAM Suite, or INX InFlight, +Advanced Cleaning gives site managers complete visibility across their cleaning operation with an immediate view of available clean rooms, maintenance needs and cleaning workloads.

The app's inbuilt workflows enhance process consistency and compliance, ensuring all stakeholders are quickly and accurately communicated relevant information necessary to complete their tasks.
