

For your piece of the planet

The future belongs to those prepared to protect it.

INX Preserve is intelligent software built for complex environments, so you can monitor, track and predict environmental impact.

Designed in concert with environmental experts, INX Preserve gives your operation transformative data and clarity.

Our intuitive software models field sampling and laboratory analysis processes to monitor environmental performance using data-driven insights.

Increase compliance. Benchmark performance. Protect your reputation.

Features

- Predefined out-of-the-box data, including parameters, units of measure and standards
- Monitoring programs to define license conditions, including warning limits
- Contextual monitoring types and points
- Data-driven chain of custody template
- Comprehensive monitoring functionality, encompassing QA/QC processes
- Intelligent laboratory data import
- Exceedance notifications
- Data table to enable data-driven insights
- Graphing of parameters over time
- Supported by mobile application
- Global support
