

Safely mobilise your remote workforce

INX InFlight enables remote workforces to become resilient in their operations.

INX InFlight has been built for travel administrators by travel administrators, designed to navigate your real-life workforce logistics challenges.

Our intuitive software simplifies the coordination of rosters, flights, accommodation and housekeeping for administrators, and provides employees and contractors with the details they need.

With INX InFlight, you can reduce administrative errors and manage multiple sites from a centralised database to ensure operational efficiency.

Power your remote workforce using a solution trusted by a significant majority of Australia's resources industry.
