

Resilient, remote operations

Mobilise your workforce efficiently to enable remote and resilient operations in fast-paced and complex industries.

INX SAM Suite centralises your workforce management operations in a highly configurable and adaptable enterprise level solution.

Our intelligent software enables you to manage multiple sites and facilitates travel and accommodation requests and approvals and apply rules-based automation for workflows, improving operational efficiency.

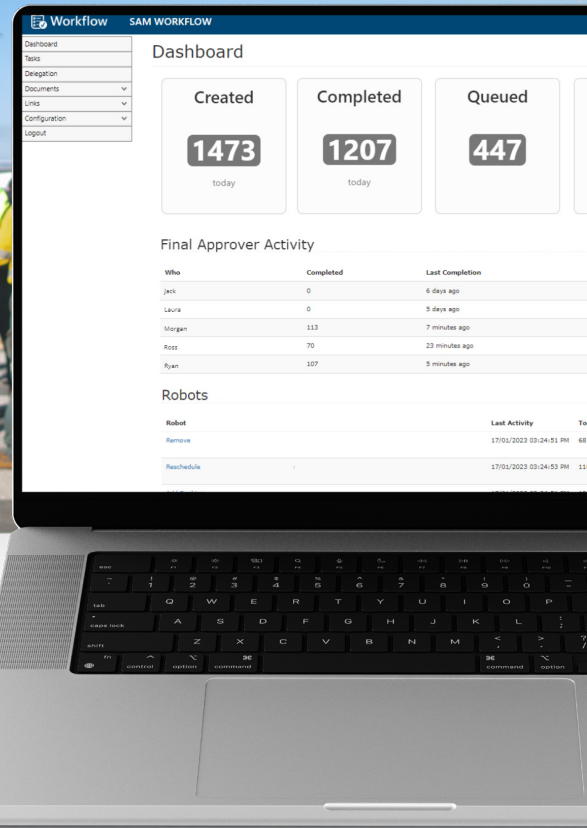

INX SAM Suite seamlessly integrates with carrier and travel management provider, human resources, camp access and other enterprise resource planning (ERP) systems.

Our solution consists of four core modules to support your business' accommodation and transport operations.

With a single view, you can navigate between our applications to improve productivity and streamline workflows.

Features

- Planning and forecasting workforce mobilisation
- Nightly audit to optimise room bookings
- Customisation of profile fields
- Fit-for-purpose custom dashboards and over 200 reporting templates
- Standard APIs for system integrations
