

Smart analytics for complex workforces

View actionable data through personalised, easy-to-use, interactive dashboards

INX+BI assists your entire workforce management, safety and training processes by providing insights and informing decision making.

Powered by our data warehouse and analytical layer, INX+BI allows you to take advantage of the set of comprehensive, pre-canned PowerBI dashboards or create your own customised PowerBI dashboards tailored to your needs.

INX+BI also supports other BI or data visualisation tools. By providing access to the most powerful part of our solution – the data in our Data Warehouse and Analytical Layer – you can connect your own tools to the data and build reports, or ingest the data into your own platform first.

Features

- Leverages best-in-class data visualisation or BI tools
- Comprehensive out-of-the-box dashboards
- Build your own custom dashboards
- Fully-documented data warehouse and analytical layer
- Ingest data from our data warehouse in your own environment
